Welcome to Manipal University! Manipal University is recognised for imparting high quality professional education. It is the preferred destination for students from over 50 countries. The university has 20 constituent colleges that offer over 195 courses across 14 streams, including medicine, dentistry, engineering, nursing, allied health, pharmacy, life sciences, management, mass communication, information science, hotel management, regenerative medicine, geopolitics, cultural studies and many more. Manipal College of Allied Health Sciences. Manipal College of Allied Health Sciences (MCOAHS) envisions to train and develop competent Health Care professionals equipped to create a difference in quality of life of the physically or mentally compromised individuals. Allied health professionals of outstanding quality are vital for holistic healthcare. With this in view, Manipal University established the Manipal College of Allied Health Sciences in 1999 as the first institution in India exclusively dedicated to the education of allied health professionals.

Department of respiratory Therapy: The Respiratory Therapy program was started in September 1995 and was designed on the similar lines of the respiratory therapy program being offered at The College Of Allied Health Professionals, Lomalinda University, California, U.S.A . It is a four year degree program which includes 3 years student period and 1year internship and a two year post graduate program. Respiratory therapists provide the hands-on care that helps patients recover from respiratory illness. Therapists are care givers, educators, and advocates for their patients.

‘When it has to do with breathing. RT’s are always there’.
